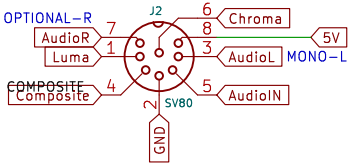
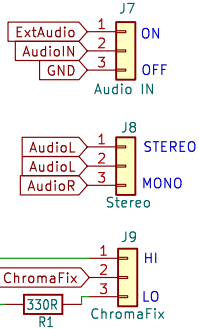
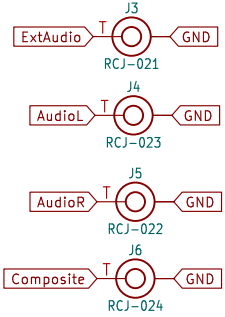
DIN 8 A/V



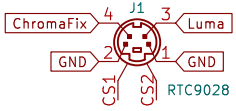
SWITCHES



RCA



S-VIDEO



5V POWER OUT

DESCRIPTION

This is a design based on Sven Petersen's C128 AV adapter. He also did a C128 version but I figured there should be a combined version that works on both!

I have moved the S-Video connector beside the RCA jacks and added clearance between the jacks and the DIN connector to allow the adapter to fit on either C64 or C128 without interfering with the IEC connector. All jumpers are now 3-pin. this will allow small SPDT switches to be installed. Lastly, I have added a header for 5V power.
