## DESCRIPTION

This is a multi-system DIN-5 or DIN-8 AV Port to S-Video and RCA Video plus Audio IN and OUT. The design is inspired by Sven Petersen's C64 AV adapter.

This design will work on:

- \* C64 with 8-pin DIN (Audio IN supported)
- \* C64 with 5-pin DIN (Audio IN supported)
- \* VIC-20 with original pinout
- \* VIC-20 with Retro Channel S-Video
- \* Ultimate64
- \* Atari XE (or XL modded for S-Video)

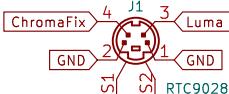

Features:

- \* Relocated S-Video to not block other ports
- \* Added vertical clearance for jacks
- \* Jumpers are all 3-pin to allow SPDT switches
- \* +5V power header (C64/128 DIN-8 systems)
- \* Header for connection to external devices
- \* Solder pad jumpers to configure for different systems
